Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
 - If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
 - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
 - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Claims 1-3 are presented for examination.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-3 are rejected under 35 U.S.C. 103(a) as being unpatentable over Malfroy-Camine et al. (U.S. Patent 6,046,188) and LaHaye et al. (5,075,116).

Malfroy-Camine et al. Teach the use of the claim-designated compounds as antioxidant for the treatment of diseases by acting as free radical scavenger. See the abstract and column 6, lines 36-67. The above reference differs from the claimed invention in the use of the claimed compounds for the treatment of macular degeneration, diabetic retinopathy or retinal edema. LaHaye et al. Teach the use of free radical scavengers and antioxidants for treating diseases such as macular degeneration. See column 4, lines 34-40. It would have been obvious to a person skilled in the art to use the claimed compounds for the treatment of macular degeneration, considering that LaHaye et al. teach, that free radical scavengers and antioxidants have been previously used for the treatment of macular degeneration.

One skilled in the art would have been motivated to combine the teachings of the above references, since one relates to the use of the claimed compounds as free radical scavenger and the other relates to the use of free radical scavengers and antioxidants for the treatment of macular degeneration. The above references in combination make clear that the free radical scavengers and antioxidants have been

Art Unit: 1614

previously used for the treatment of macular degeneration. The above references also make clear that the claim-designated compounds are considered to be antioxidants with free radical scavenger activity. Applicant has presented no evidence to establish the unexpected or unobvious nature of the claimed invention, and as such, claims 1-3 are properly rejected under 35 U.S.C. 103.
